- Control of cracking and joint management
- Troubleshooting and Common Defects – Cracks and Delamination
- Selection criteria of concrete suppliers and mix
- Best practices and understanding project management and construction of High performance floor
- Best practices on Screeding, levelling, straightening and finishing
- Why floors cracks, causes and preventive measures

## ●●● Seminars Continue

CONCRETE FLOORS ASIA (CFA) is continuing its updated informative and ground-breaking seminar on industry best practices of high performance concrete flooring in May/June 2016. This year, it will be in Colombo – Sri Lanka and Jakarta – Indonesia. CFA have conducted very successful seminars in Bangkok, Mumbai, Ho Chi Minh, Jakarta, Surabaya, Kuala Lumpur, Johor Bahru, Shanghai & Mania for the past 4 years and counting!

Participants can expect comprehensive coverage of the updated best current construction practices, technology and equipment to produce the most appropriate flatness, levelness, durability and longevity in floors. The CFA will continue to bring in leading experts from around the world who specialise in various aspects of concrete flooring and construction. As in the previous seminars, these experts will bring vast knowledge and many years of experience in floor construction activities. Participants will have first hand access and practical know-how on the best practices in the process of construction of concrete floors and get to talk to all the leading experts speakers.

**The Seminar will feature case studies & how getting it right saves our planet!**

## International Supporters:

## Who Should Attend?

- Admixture Companies
- Architects
- Contractors
- Concrete Suppliers
- Structural & Design Engineers
- Logistic Associations
- Logistic Companies
- Main Contractors
- Project Management Companies
- Concrete Contractors
- Facility Operator
- Owners
- Racking Companies
- Fork Truck Companies
